

➤ How do you develop critical global skills across fields?

“Fostering Global Competence Across All Disciplines & Professions” | Presenters: Molly Stern, Pablo Cornejo

Why do all disciplines need Global Competence training?

Through research-backed online modules and facilitated dialogues, the AFS Global Up program fosters Global Competence, equipping learners with cultural self-awareness, awareness of others, emotional intelligence, and essential tools to effectively bridge differences.

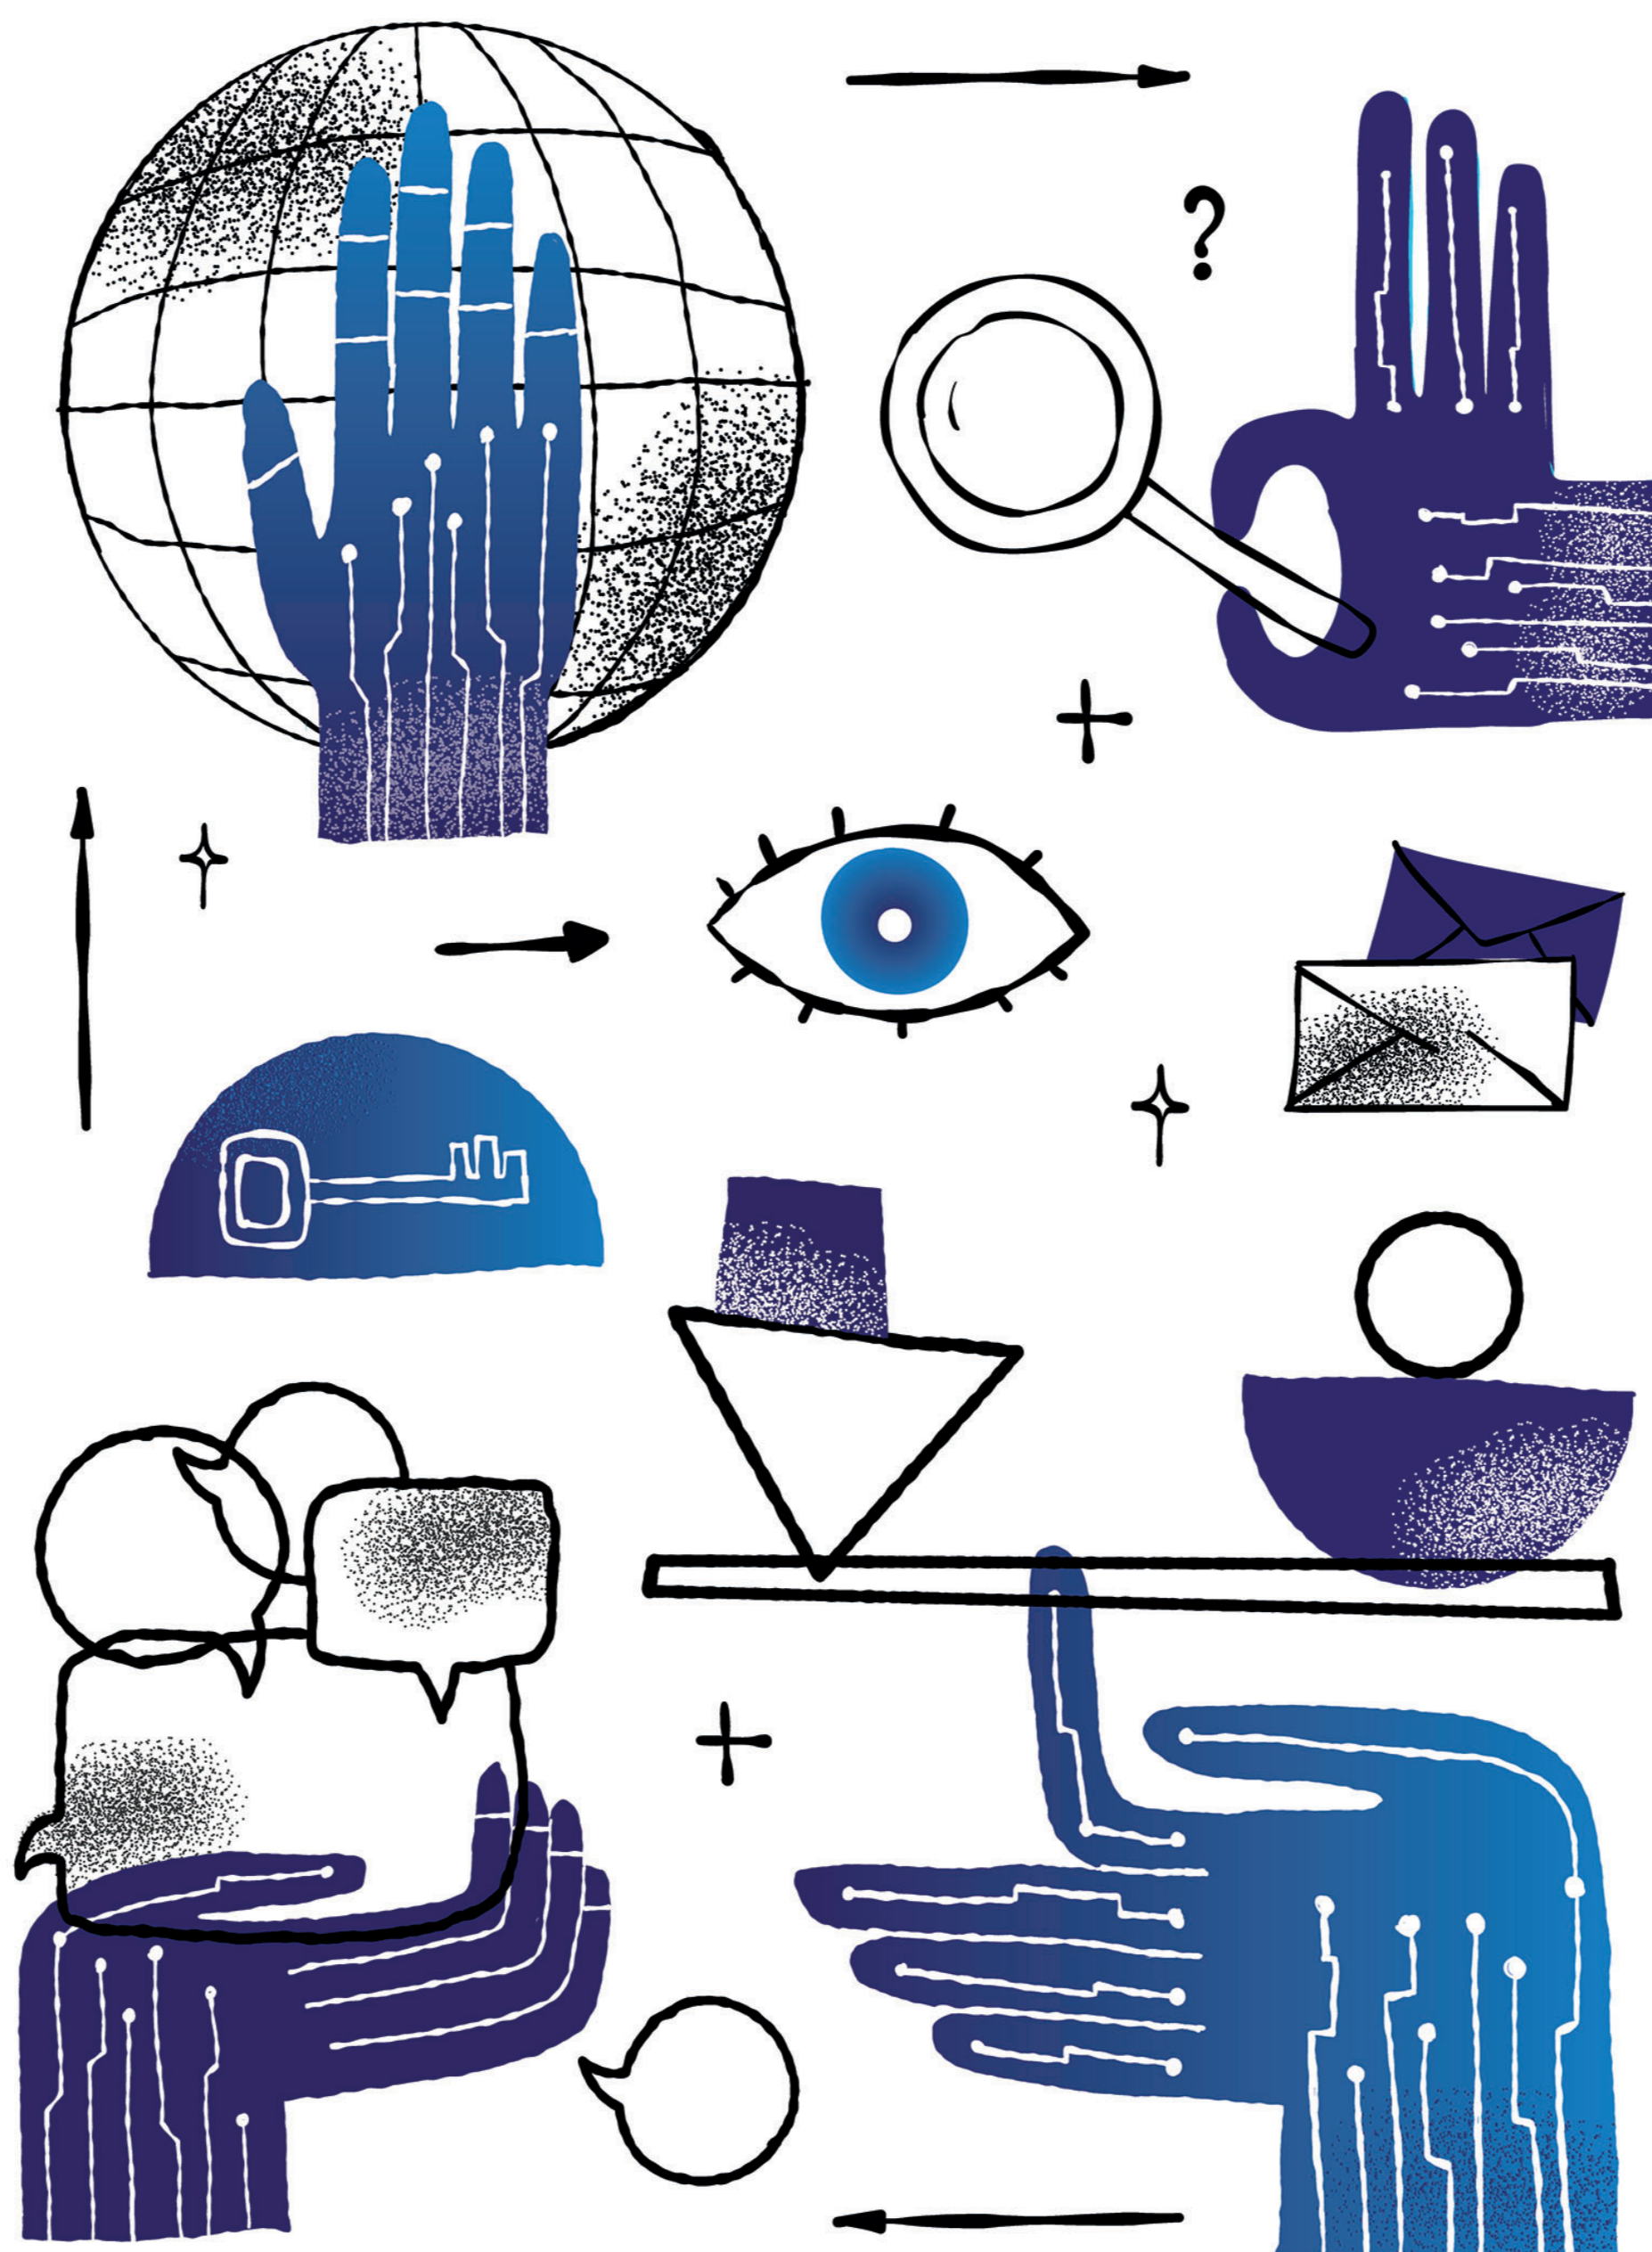

“Global Up wasn't just about appreciating our different cultures; it brought us together as a team. Going through this program with colleagues that I worked with, but didn't necessarily see daily, fostered a real sense of connection. We saw each other as people first, not just staff or faculty positions.”

Facilitating for the first time, I gained immense respect for the role. It takes courage to open up discussions, and I learned that vulnerability is key. Sharing my own experiences, even if it meant risking judgment, encouraged others to do the same. It was a powerful lesson in building trust and understanding.”

- Dr. Mary Johnson, Brenau University

➤ Power Skills for future-ready careers

Developing Global Competence equips learners to think critically, expand perspectives, and tackle the world's grand challenges.

UST utilized the GCC in the Legal and Engineering Departments and for faculty professional development. Law school professors remarked that this contributed to well-rounded lawyers, able to look at cases from multiple perspectives.

Sinclair CC brought Global Competence learning to their workforce development center and online leadership series.

“We have used Global Up programs since 2021. Not only can we quantitatively show improvements with the student IDI scores, but we can also qualitatively discuss transformation in perspectives and interactions based on the student reflection papers. The practical skills-based learning provides real-world examples for the students.”

- Dr. Nicole Warehime, Assistant Dean of CLA & Professor of SOC, University of Central Oklahoma

UCO provided the GCC for pre-med, sociology and study abroad students. The pre-med professors showcased why they prioritize this learning at national medical conferences.

SNHU trained Deans across various disciplines in global competence to support their tremendous student body (170K) from all over the world.
