WHY PARTNER WITH THE YOUTH ASSEMBLY

The United Nations has identified five "megatrends" that will shape our world over the course of this century: climate change and nature degradation, inequalities, urbanization, rapid population changes and technological revolution.

With approximately 1.2 billion people aged 15-24 years (youth are up to 35 years old in some countries) accounting for 16% of the world population, young people must be the center of the social change needed to address these challenges.

Youth Assembly partners play an important role in the development of our program. You'll contribute ideas, resources, expertise, volunteer power, and in-kind support as we work towards accomplishing our mission of empowering youth for global change. Join us in building a movement of emerging leaders. Help us nurture a large network of young delegates from around the world. Provide learning and networking opportunities, promote intergenerational dialogue and propel ideas from creation to implementation.

By engaging the next generation of leaders and decision makers, you'll be working towards actively creating a better world.
